1 Profile

Software engineer with 4+ years delivering Java 21 and Spring Boot systems for public-sector and enterprise clients. At ADD: REST and event-driven microservices (Kafka, Redis), Angular and React, Keycloak, Docker and Kubernetes. Building toward data engineering and applied AI — Data & Software Engineering degree (INSEA), AI exchange at Université Laval, data-science internship at Beneva, and pipeline work from the DataTalksClub Zoomcamp. Works in French, English and Arabic.

2 Professional Experience

Software Engineer (Freelance)

Since Sept. 2024

Agence de Développement du Digital (ADD) — Morocco's national digital development agency, Rabat

- Design and build Java 21 / Spring Boot services and Angular / React interfaces for public-sector digital services, using Kafka for cross-service events and Redis for caching.
- Deploy and orchestrate services with Docker and Kubernetes; manage authentication and IAM with Keycloak.
- Cover services with JUnit, Mockito and integration tests before release.
- Gather requirements directly with client stakeholders and turn them into sprint-ready work.
- Mentor junior developers and lead the team on sprint goals in Scrum.

Tech stack: Java 21, Spring Boot, Spring Data JPA, Hibernate, Angular, React, Kafka, Redis, Keycloak/IAM, Docker, Kubernetes, GitLab, CI/CD, JUnit, Mockito, Mendix.

Software Engineer

Aug. 2022 – Aug. 2024

Inetum Morocco — French IT services group, Rabat

- Built Spring Boot microservices and REST APIs for production applications, in Scrum.
- Delivered Angular interfaces with cross-functional teams; wrote unit and integration tests (JUnit, Mockito).
- Containerized services with Docker; CI on Jenkins and GitLab. Used Mendix when rapid delivery was the constraint.

Tech stack: Java, Spring Boot, Angular, Docker, Jenkins, GitLab, Jira, Scrum, JUnit, Mockito, Mendix.

Data Science Intern (Final-Year Internship)

May – Aug. 2022

Beneva — Québec, Canada

- Segmented customers with clustering and built dashboards; estimated customer lifetime value and plotted survival curves.
- Proposed analyses to support company decision-making (Python, scikit-learn, PyTorch, SQL, Azure).

Tech stack: Python, scikit-learn, PyTorch, SQL, Azure, GitLab, Scrum.

3 Selected projects

ChantiePro — 16 Spring Boot 3.3 services on Java 21, 6 shared libraries, 31 Flyway migrations, Kafka, Angular 18.
github.com/ZakariaeJaafari/chantiepro

NYC Taxi Ingestion Pipeline — memory-bounded load of NYC TLC trip files into PostgreSQL in 100,000-row chunks. github.com/ZakariaeJaafari/nyc-taxi-ingestion-pipeline

4 Education

M.Sc. in Computer Science — Artificial Intelligence

Aug. 2021 – May 2022

Université Laval — Québec, Canada (exchange programme)

Engineering Degree in Data and Software Engineering

Sept. 2019 – May 2022

INSEA — Rabat, Morocco

5 Certifications

Rapid Developer Certificate — Mendix

Jan. 2024, ID 69110

6 Technical skills

Software. Java 21, Spring Boot, Spring Data JPA, Hibernate, Spring Security, Spring Cloud Gateway, Eureka, REST APIs, Microservices, Angular, React, TypeScript, JavaScript, SQL, PostgreSQL, Oracle DB, PL/SQL, Redis, Kafka, Flyway, Keycloak/IAM, Docker, Kubernetes, Maven, Git, GitLab, Jenkins, CI/CD, Agile/Scrum, JUnit, Mockito, Azure, Mendix.

Data engineering. Docker Compose, Terraform, GCP, BigQuery, dbt, DuckDB, Kestra, Spark, pandas (DataTalksClub Data Engineering Zoomcamp).

Data science. Scikit-learn, PyTorch.
