1 Profile

Full-stack engineer with 4+ years shipping production software, from enterprise platforms to microservices and data pipelines. Fluent in English, French, and Arabic. Comfortable owning features end-to-end as an autonomous freelance consultant. A generalist by background — Java and Spring backend, Angular and React frontend, SQL-heavy data work, and Mendix low-code delivery — with hands-on experience across Docker, Kubernetes, and event-driven microservices (Kafka, Redis).

2 Professional Experience

Software Engineer (Freelance)

Since Sept. 2024

ADD Agency — Rabat, Morocco

- Design and build full-stack solutions for enterprise clients, from low-code (Mendix) applications to custom Java, Spring, Angular and React systems with event-driven microservices.
- Build responsive, intuitive UIs using Angular, React, and Mendix's custom UI framework with custom widgets and JavaScript actions.
- Develop backend services in Java and Spring Boot, using Redis for caching and Kafka for event-driven communication between microservices.
- Deploy and orchestrate services with Docker and Kubernetes; manage authentication and IAM with Keycloak.
- Work directly with clients to gather requirements, mentor junior developers, and lead the team on sprint goals in an agile environment.

Tech stack: Java, Spring Boot, Angular, React, Mendix, Microservices, Redis, Kafka, Kubernetes, Keycloak/IAM, Docker, GitLab.

Software Engineer

Aug. 2022 – Aug. 2024

Inetum Morocco — Rabat, Morocco

- Built and consumed microservices and REST APIs following agile methodologies, for scalable production applications.
- Delivered responsive, intuitive UIs using Angular, working directly with cross-functional teams on requirements and planning.
- Containerized applications with Docker for efficient deployment and management.
- Built applications on the Mendix low-code platform for rapid delivery.

Tech stack: Java, Angular, Spring Boot, Docker, Jenkins, GitLab, Jira/Scrum, ETL/SSIS, Mendix.

Data Science Intern (Final-Year Internship)

May – Aug. 2022

BENEVA — Quebec, Canada

- Explored and ran in-depth analysis of customer data to surface trends, patterns, and actionable insights.
- Applied clustering techniques to segment customers into groups with similar behaviors, visualized through interactive dashboards.
- Applied statistical methods, machine learning, and deep learning to estimate customer lifetime value and plot survival curves.
- Proposed solutions to optimize company decision-making processes.

Tech stack: Git, GitLab, Jira, Python, Scikit-learn, PyTorch, Azure Cloud, Scrum, SQL, Power BI.

3 Education

M.Sc. in Computer Science — Artificial Intelligence

Aug. 2021 – May 2022

Université Laval — Quebec, Canada (exchange programme)

Engineering Degree in Data and Software Engineering

Sept. 2019 – May 2022

INSEA — Rabat, Morocco

4 Certifications

Rapid Developer Certificate — Mendix

Since Dec. 2023

5 Technical skills

Software. Python, Java, JavaScript, TypeScript, SQL, Angular, React, HTML/CSS, Spring Boot, Mendix, REST, OData, Microservices, Redis, Kafka, Keycloak/IAM, Docker, Kubernetes, Oracle DB, PL/SQL, Azure.

Data engineering. Docker Compose, Terraform, GCP, BigQuery, dbt, DuckDB, Kestra, Spark, PostgreSQL, pandas (DataTalksClub Data Engineering Zoomcamp).

Data science. Scikit-learn, PyTorch, Power BI, ML/DL.
