Profile

Software engineer with 4+ years across public-sector delivery and IT services. At ADD, I build Java 21 / Spring Boot services, Angular / React interfaces and Kafka / Redis integrations, with Keycloak IAM and Docker / Kubernetes delivery. Public projects extend that backend foundation into tested data engineering with Python, dbt, DuckDB, Bruin and MotherDuck. INSEA engineering graduate in Data and Software Engineering; works in French, English and Arabic.

Professional experience

- Since Sept. 2024 **Software Engineer (Freelance)**, *Agence de Développement du Digital (ADD)*, Rabat
Morocco's national digital development agency.
- Design and build Java 21 / Spring Boot services and Angular / React interfaces for public-sector digital services.
 - Kafka for cross-service events, Redis for caching; deploy and orchestrate with Docker and Kubernetes.
 - Authentication and IAM with Keycloak; JUnit, Mockito and integration tests before release.
 - Gather requirements directly with client stakeholders and turn them into sprint-ready work.
 - Mentor junior developers and lead the team on sprint goals in Scrum.
- Tech stack:** Java 21, Spring Boot, Spring Data JPA, Hibernate, Angular, React, Kafka, Redis, Keycloak, Docker, Kubernetes, GitLab, CI/CD, JUnit, Mockito, Mendix.
- Aug. 2022 – Aug. 2024 **Software Engineer**, *Inetum Morocco*, Rabat
French IT services group.
- Built Spring Boot microservices and REST APIs for production applications, in Scrum.
 - Delivered Angular interfaces with cross-functional teams; wrote unit and integration tests (JUnit, Mockito).
 - Containerized services with Docker; CI on Jenkins and GitLab. Used Mendix when rapid delivery was the constraint.
- Tech stack:** Java, Spring Boot, Angular, Docker, Jenkins, GitLab, Jira, Scrum, JUnit, Mockito, Mendix.
- May – Aug. 2022 **Data Science Intern (Final-year internship)**, *Beneva*, Québec, Canada
- Segmented customers with clustering and built dashboards; estimated customer lifetime value and plotted survival curves.
 - Proposed analyses to support company decision-making (Python, scikit-learn, PyTorch, SQL, Azure).
- Tech stack:** Python, scikit-learn, PyTorch, SQL, Azure, GitLab, Scrum.

Selected projects

- ChantiePro 16 Spring Boot 3.3 services on Java 21, 6 shared libraries, 31 Flyway migrations, Kafka, Angular 18.
<https://github.com/ZakariaeJaafari/chantiepro>
- NYC Taxi dbt Dimensional models with dbt and DuckDB: 109,047,518 yellow trips at source, 8,298,395 sampled facts, and 34 tests executed in CI.
<https://github.com/ZakariaeJaafari/data-analytics>
- NYC Taxi Bruin ELT on DuckDB and MotherDuck: batched PyArrow ingestion, deduplication, quality checks, 6,405,008 cloud rows, and SQL tests in CI.

Education

- Aug. 2021 – May 2022 **Graduate exchange programme — Artificial Intelligence, Université Laval, Québec, Canada**
- Sept. 2019 – May 2022 **Engineering Degree in Data and Software Engineering, INSEA, Rabat**

Certifications

- Jan. 2024 **Rapid Developer Certificate — Mendix, ID 69110**

Technical skills

- Backend & web Java 21, Spring Boot, Spring Data JPA, Hibernate, Spring Security, REST APIs, microservices, Angular, React, TypeScript
- Data Python, SQL, PostgreSQL, dbt, DuckDB, MotherDuck, Bruin, PyArrow, Parquet, pandas, Kestra, Kafka, Redis, Flyway
- Delivery & quality Docker, Kubernetes, GitLab, Jenkins, CI/CD, JUnit, Mockito, Keycloak, Mendix
- Data science scikit-learn, PyTorch

Languages

- Arabic Native
- French Fluent
- English Fluent
